

# James Maddox

## Junior Software Developer

Ever since I can remember, whether it was crafting custom WWE wrestler websites at the age of 10 or using HTML to change my MySpace page in high school, I've always had a passion for developing. I enjoy and excel at imagining solutions to complex problems, rapidly acquiring new skills, and achieving goals under high pressure. My desire is to join an organization that is passionate about technology and solutions that make people's lives better.
